Week 3: Balancing Responsibilities

- Review From Last Week

- Intro

- Main
  - Leader Responsibilities
  - “Follower” Responsibilities
  - Scenarios

  *You graded all student exams. For ABET purposes, you’ve made copies of randomly selected exams. The exams are then handed back to the students. A day later, one student returned the test to you, claiming you graded his exam wrong. Coincidentally this exam was one of the randomly selected ones. Comparing to the copy, the answers on the exam were altered. What do you do?”*

  *Lab report #1 is due today. 60% of the students in your lab did not finish the report. You did not mention the due date last week, but the due date was clearly written in the lab manual. Students claim that you did not mention this due date during last week’s lab, and demand an extension period. What do you do?*

  *The grading rubric said the project is a pass if the fan slows down at low temperature. You misunderstood the rubric and thought the fan must stop for the project to pass. You graded your 24 students the same way, and gave F’s to the ones with a fan that only slows down but doesn’t stop. You realized your mistake 2 weeks after. What do you do?*

- Looking Forward
  - Week 4 TA’ing
    - Student Stress Due to Midterms
    - Midterm Exam Proctoring, Grading, etc.
    - Handing Back Graded Material
