- Review From Scenarios
  1. *During your lab section, one student from another section came in seeking for help. This student has many questions and is taking a major chunk of your time. What do you do?*

  2. *You are a project manager of an IC company. One of your duties is to conduct weekly evaluation on each of your 20 team members. One of your team members is clearly not performing as well as the rest of the people, and this person’s performance has not improved in a long time. The poor performance eventually leads to the termination of this individual’s job. This individual, who happens to be the only minority in your team, made this into an affirmative action matter. As the leader of the team, what do you do?*
