BeaverSource and Senior Design

In order to make grading and evaluation easier, you will need to setup your BeaverSource in a certain way. First, you need to ensure that your outline matches the one listed below. Second, you will need to utilize two macros for the system requirements and the Testing Sections. Finally You need to link your BeaverSource Milestones to the 'Project Time Line'

Outline:
For your main page, you need to use the following wikicode:

1 Project Overview[[BR]]
2 [wiki:BackgroundResearch Needs Identification and Background Research] [[BR]]
3 [wiki:SystemRequirements System Requirements and Desired Features] [[BR]]
4 [wiki:DesignSolutions Design Solutions] [[BR]]
5 [wiki:TopLevelBlockDesign Top Level Block Design] [[BR]]
  5.1 [wiki:PowerSupply Power Supply][[BR]]
  etc...
  5.n [wiki:HighLevelControl High-Level Controller Code][[BR]]
6 [wiki:Testing Testing][[BR]]
7 [http://beaversource.oregonstate.edu/projects/YOURPROJECT/roadmap Project Timeline] [[BR]]
8 [wiki:Budget Budget][[BR]]

Macros:
Under the System Requirements and Desired Features, you should use the macro below. No other content should be added in the wiki.

[[ECE44xRequirements(group, passcode)]]

'group' is your group number. This is the year, followed by your group number including a leading zero on single digit numbers. I.e. Groups 7 this year would use '200907'

'passcode' is any password you would like to use. You should use one passcode for your project. Changing your passcode halfway through entering requirements is very bad mojo. Do not share your passcode with other groups.

For the testing section you should use this macro instead.

[[ECE44xTesting(group,passcode)]]

'group' is your group number. This is the year, followed by your group number including a leading zero on single digit numbers. I.e. Groups 7 this year would use '200907'

'passcode' is any password you would like to use. You should use one passcode for your project. Changing your passcode halfway through entering requirements is very bad mojo. Do not share your passcode with other groups.
