The ILC is for freshman with:

- A substantial ECE or CS background
- The ability to work in a team and the potential for leadership
- Excellent problem solving skills
- Solid communication skills (writing, speaking, presenting)
- A GPA indicating high school success
- A passion for learning and sharing
- The ability to work 4+ hours over their existing credit load
The ILC will provide you with:

- Multiple opportunities opportunity to work on cutting edge projects (*OSWALD, Intel Atom Processor*)
- Networking opportunities for industry internships and future employment
- Preparation for research and graduate school
- A $300 scholarship each term you are a member
- Exposure to open source and software development tools
- A chance to become part of the OSU EECS community
What you need to do to apply:

Send an e-mail to Dedrie Beardsley beardsld@onid.orst.edu TODAY!!

You will be asked to briefly answer the following questions by Monday October 3rd at noon.

1. Are you pre-CS or pre-ECE? What is the first CS or ECE course you will take at OSU?
2. Describe a team project in which you played a significant role. Include brief descriptions of the project, the team, and your role.
3. What computer programming languages (if any) do you use? What is your level of expertise in each of these languages?
4. Describe your experience (if any) with developing / implementing digital circuits.
5. Describe your experience with open-source development and software development tools (e.g., debugging, version control, etc.)
