Assignment #7 – PHP/MySQL Project
Due: Thursday, 12/01/11, 11:59pm

1. (75 pts) Finish creating your html and php pages for your real-world application. Implement the functionalities that you have defined for your application, as well as the ability to insert a record, search for records, update a record, and delete a record from your ONID database using your web forms.

2. (25 pts) Update your design document from Assignment #5 with any changes. This includes new screen shots of your user interface, new questions you are answering, etc. Please remember to provide your partner’s name, if you are working on a group project. In addition, provide the location of your website, if it is somewhere other than engr.oregonstate.edu/~username and any special instructions for using your real-world application. You will turn in this document through TEACH.

Now, take a deep breath because you’re done😊
