The Intel Learning Company aims to provide exceptional EECS freshmen with an environment supporting the achievement of technological, professional, academic and personal excellence through access to mentors, challenges, and advanced technology.
The ILC is for freshmen with:

- A strong ECE or CS background, and/or...
- A passion for learning and sharing
- The ability to work in a team and the potential for leadership
- Excellent problem solving skills
- Solid communication skills (writing, speaking, presenting)
- A GPA indicating high school success
- The ability to work 4+ hours over existing credit load
The ILC provides students with:

- Opportunities to work on cutting edge projects (*OSWALD, Intel Atom Processor*)
- Networking opportunities for industry internships and future employment
- Exposure to open source and software development tools
- Preparation for research and graduate school
- A small scholarship each term
How to join the ILC:

Email your resume to cjensen@eecs.oregonstate.edu, and please give the following information (maximum of 4 sentences for each response):

1. Are you pre-CS or pre-ECE?

2. Describe a team projects in which you played a significant role. Include brief descriptions of the project, the team, and your role in the team.

3. What computer programming languages (if any) do you use? What is your level of expertise in each of these languages?

4. Describe your experience (if any) with developing / implementing digital circuits.

5. Describe your experience (if any) with open-source development and software development tools (e.g., debugging, version control, etc.)

6. Explain why you want to be part of the ILC, and how you could contribute to the program
