LAB #7
Make Your Academic Plan

1. Check your grades on BB to make sure they are accurate!!! If not, then contact the TAs or myself!!!!

2. Since MyDegrees is used throughout the university, ALL students will watch the video displayed by your TA at the front of the lab. Calvin Hughes’s video on making a CS plan using MyDegrees:
   http://www.youtube.com/watch?v=6K2OrHVFLA&feature=youtube

   If you are not a CS major, go to step 5...
Make the Academic Plan in MyDegrees (10 pts)

3. You will not be doing paired programming in this lab. Now that first year advising isn’t in the department, let’s take some time to think about your CS specific academic plan. First, let’s start by thinking about the CS option that might be right for you, and use the example plan to help you decide your classes for the next two years:

   Systems:
   Applied:
   http://eecs.oregonstate.edu/sites/eecs.oregonstate.edu/files/forms/undergrad/cs_applied_2014-2015.xls

4. Now, you need to create an academic plan that is for all the terms until you apply for pro-school. You will use the MyDegrees planner, and ask a lab TA to assist you if you have trouble planning. Make sure to check the boxes and save your plan. Then, select the preview plan to see your changes in the left pane.

   You must make sure that the classes you choose for the Winter and Spring 2015 quarters are able to be taken together and do not have any time conflicts. Use the online catalog to help find out when classes are offered in the upcoming quarters: http://catalog.oregonstate.edu/Default.aspx

   If you are not a CS student or you finish early (10 pts):

5. Write a python program that takes integer numbers from the user and adds them to a list of numbers, if the number isn’t already in the list. You cannot use the in() function.
After you have created the list, then ask the user if they want to replace any values in the list. If they do, then get the value to find and the replacement value.

**Everyone (2 pts)**

6. Lastly, you need to fill out the Blackboard Survey, “**CS Comfort Rating**”. Go to the CS160-001 site on Blackboard, and then, click on Course Documents. You should see the survey at this point. If you enter yes for the first question, then please enter N/A for your answer to the second question. Thank you!!!

Make sure you sign-up with a TA for demoing/explaining your Assignment #5 this week and Assignment #6 next week. This is how all assignments are graded in the course, and if you sign-up and do not make your appointment without rescheduling, then you will be penalized 50 points!!!
