Exercise #1 (No computers needed)
Due Friday, 10/02/2015, at 11:59pm

What is computer science?

- Explain these 3 terms:
  - Computer science, algorithm, programming, Base 2
- Convert 51 (base 10) to the base 2 equivalent.

Assignment #1

As a group, come up with a list of at least 10 of each of the following:

- Companies associated with computer science.
- Areas of computer science or those using computer science.

For take-home exercises completed in peer-led groups, each student must participate and write answers to each of the questions on his/her own paper to show for credit. Your 1-2-3 grade will be based on the completion/understanding shown on your own piece of paper shown to your TA for a grade before leaving the group session!!!

For take-home exercises completed on your own, turn in your work electronically using the TEACH website!!!
