Assignment #10
Prior Assignment Reflection and Creation
Due: Sunday, 12/03/17, 11:59pm

Grading: For this assignment, you will be graded traditionally, i.e. **Jesse will review your paper on his own time.** However, you need to **make sure you have Assignment #9 demoed/graded by the end of the week 10!**

Since the learning curve is different for everyone in this class, let's use this assignment to reflect on past assignments to see how far we have come and give you an opportunity to create a new assignment for the future CS 160H students. You will write about how you might solve or approach prior assignments differently, as well as what you learned from the assignment, and then you will be asked to create a new assignment for one of the weeks in this class.

(60 pts) Assignment #1 - Assignment #9 Reflection: **Write at least 5 sentences in response to each question below.**
- Which assignment(s) did you like the most? Why?
- Which assignment(s) did you like the least? Why?
- Which assignment(s) did you learn the most from or feel most proud of? Why?
- Which assignment(s) would you change for future students, and how would change the assignment(s)?
- What was the hardest concept(s) to understand in this course? Why?
- What was the easiest concept(s) to understand in this course? Why?

(40 pts) Create a New Assignment:
- Come up with a new assignment for CS 160H with a complete description of what the assignment is asking.
- Provide the concepts from CS 160H that are required to do the assignment and why these concepts are needed.
- Provide the rubric for grading the assignment.

Electronically submit your **reflection as a pdf (Automatic 20 pts deduction for file not being a pdf)** by the assignment due date, using TEACH:
https://secure.engr.oregonstate.edu:8000/teach.php?type=want_auth
