

CS 160

CS Orientation

Command-line Args and File I/O

Command-line Args

- Import **sys** module
- Access argument values
`sys.argv`

Demo...

File I/O

- Open file (read, write, append)
- Attach to object
 - `f=open("filename", "r")`
- Read/Write to the file
 - `f.read()` vs. `f.readline()`
 - `f.write()`
- Close file
 - `f.close()`

Demo...
