

Detail & Section Guidelines

- ❑ Details should be labeled with a title, scale centered under the title and reference numbers in a bubble callout to the right of the title.
- ❑ Sections should be labeled with a letter designation in this format: SECTION X-X # (sheet reference is shown to the right of the title) and scale centered underneath.
- ❑ Detail and section viewports should be arranged and numbered/lettered in order to be read from left-to-right/top-to-bottom.

Tip: Detail & Section Referencing Standards

Detail and section view titles should be center-justified over the scale.
